

Spacer couplings for pump and compressor applications simplify servicing connected equipment. Spacer couplings use a standard double engagement coupling with a spacer tube and an additional set of fasteners. Stock spacer lengths for quick delivery are available in the popular sizes. Special lengths are also available.

✓ From size 45 (included) the coupling is supplied by default with puller holes. If required, puller holes can also be made for smaller sizes.

✓ Setscrews can be included upon request.

✓ Adapted hub length available upon request.

- (1) The torque of the coupling does not include the connection transmission capacity.
- (2) n MAX speed for balanced couplings. For higher speeds contact Feinnord.
- (3) Max. allowable bore for couplings with DIN 6885/1 key. For other types of keys or connections please contact Feinnord.
- (4) Weight and moment of inertia are given for minimum bore.
- (5) Weight is given for maximum bore.
